EXPERIENCE

Tata Consultancy Services

Nov 2024 – Present

Systems Engineer - Developer

Bengaluru, KA

- Java Developer on a UK-based Insurance project, building secure and scalable backend services using **Spring Boot** and **Spring Framework**, integrated with a React.js frontend.
- Contributing to building a new **Microservices-based system** by adapting core business logic from a legacy monolithic application for large-scale production data.
- Owned the end-to-end initial development of a **Microservice**, including REST API design, centralized error handling, and service configuration.
- Implemented **Azure AD OAuth2 with JWT-based security** to secure Microservices in a live pre-production environment.
- Optimized performance by identifying method-level bottlenecks using **Azure Application Insights** and **Dynatrace**, reducing latency via **Redis caching**.
- Contributed to writing and maintaining **3000+ unit tests** using JUnit and Mockito, integrated **Swagger** for API documentation, and helped deliver the project early with **100% CSS**.

NOKIA Networks

Aug 2023 – May 2024

Student Intern

Chennai, TN

- Worked as part of the **developer team**, collaborating closely with the DevOps team to migrate an automation framework from Java (Jython) to **Python** using **Robot Framework**.
- Developed Python automation scripts and assisted with **Jenkins pipelines**, gaining hands-on exposure to **Docker** and **Kubernetes** in CI/CD workflows.
- Contributed to migrating **3500+ automation test cases** with zero functional impact, focusing on **three priority-1** pipelines.

SKILLS

Programming Languages: Java, Python, JavaScript

Frameworks, Backend & APIs: Spring Framework, Spring Boot, Hibernate (JPA), ReactJS, REST APIs, Microservices

Technologies: Microsoft Azure, Git, Linux, Dynatrace, Jira, Jenkins, Docker, Kubernetes, Confluence

PROJECT

Secure E-Commerce Microservices Platform | Java, Spring Boot, Spring Cloud, JWT, PostgreSQL, API Gateway [\[GitHub\]](#)

- Built a production-style microservices system with API Gateway, Eureka discovery, and centralized config using Spring Cloud.
- Implemented JWT-based authentication with role-based access control and method-level security across services.
- Developed order workflow with inventory reservation, payment simulation, and inter-service communication using WebClient.

CERTIFICATIONS

Microsoft Certified: Azure AI Fundamentals (**AI-900**) [\[Link\]](#)

Jan 2026

Microsoft Github Copilot Certification (**GH-300**) [\[Link\]](#)

Oct 2025

Microsoft Certified: Azure Fundamentals (**AZ-900**) [\[Link\]](#)

Jul 2024

EDUCATION

Vellore Institute of Technology | Vellore

May 2024

Integrated M.Tech. Software Engineering

CGPA: 9.37 / 10.0
